

Giudici Enrico firm, traditional family company, established in the distant 1965, dedicated first to raw materials production and next specialized in manufacturing, extrusion and moulding, becoming the reference point for all those people assigned to the processing of plastic material.

In the course of 90's, the company specified on cleaning items for household and professional.

The offer now is a wide range of equipments and accessories specialized on floor cleaning; we also extrude profiles for building and furnishing.

Production is entirely made in Italy, in Lonate Pozzolo (Varese) – Italy, Via Toce 8, at Giudici Enrico seat. Our aim is to supply cleaning items for household and professional in the domestic and international market where, a good quality and functional designs added to long-lasting durability with a good rapport to price/quality, are still an important value.

All our products are manufactured respecting labour rights and we use completely or mostly recycling materials as plastic, cardboard, metal, to

respect environment.
